# Monkey Multiplication

You are going to love these cute monkeys because they really motivate children to practice multiplication facts.

(Similar games to practice addition, subtraction and division facts can be found in Making Math More Fun Card Games.)

## All You Need To Do Is -

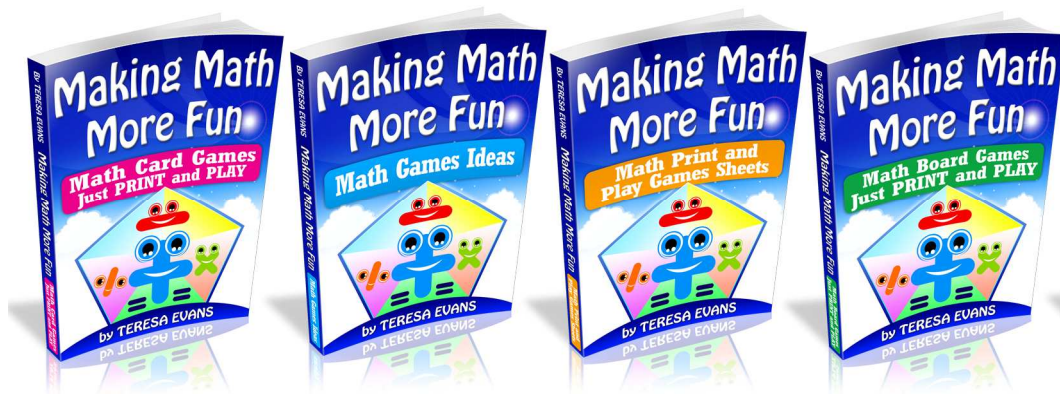

- Print Monkey Multiplication Game Cards on card – Cut along the dotted lines on the Game Cards.
- Print Number Cards on card – Cut along the dotted lines of the number cards.
- Print the Instruction Card.

Next, give them to group of 2 – 4 children and let them go or if you are a parent, you can play with your child or your children.

Many more math card games are included in Making Math More Fun Card Games.

Including similar games of  
**African Animals Addition**  
**Subtraction Snakes**  
**and Division Dog**

so kids can have just as much fun practicing addition, subtraction and division.

Please Enjoy Your Free Card Game – Monkey Multiplication.

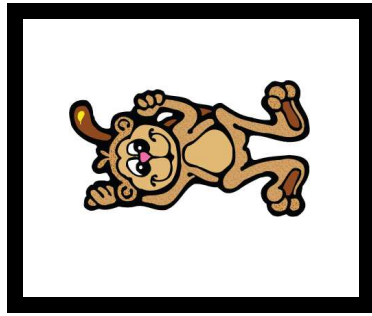

Till next time,

Teresa

## Monkey Multiplication

### Instructions

Each player has a game card. Number cards are spread out face down in the center.

To start – each player takes 4 number cards. Players then try to create a true multiplication equation by placing the number cards over the monkeys. The first player to do this is the winner. If no player can make an equation, each player picks up another card. This continues until one player creates an equation.

Repeat, with players scoring one point for each time they are first to make an equation.
